

NRCS Actions: NRCS staff in all affected counties continue to work closely with local partners to assess damage and needs. Estimated funds needed for regular EWP projects and repair of damaged EQIP practices have been requested from USDA. NRCS and DNR engineers are working together to provide technical assistance and information needed by local sponsors to assess needs and make informed decisions.

The Wisconsin State Conservationist has received approval for EWP exigency funds to provide emergency repairs for the following projects to reduce further damage to property -

Active Projects:

Lake Delton – Exigency work to protect unstable cutbanks and reroute the base flow channel is in progress.

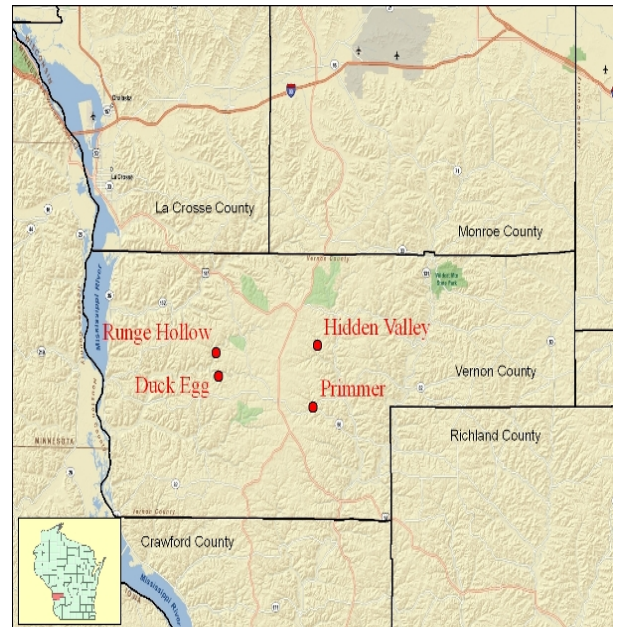

West Fork Kickapoo 4 (Hidden Valley) – The National Guard has completed work on the access road, and EWP exigency work to repair damage to the auxiliary spillway is in progress.

Completed Projects:

West Fork Kickapoo 17 (Primmer) - An emergency controlled partial breach of the dam was completed on June 18, to reduce the potential damage from future storm events.

Bad Axe 11 (Duck Egg) – Exigency work to repair damage to the auxiliary spillway was completed June 19.

Bad Axe 12 (Runge Hollow) – Exigency work to repair damage to the auxiliary spillway was completed June 18.

Other NRCS actions:
